

# M- and P-Series Essentials

TRAINING SERIES

## Spring 2026 Schedule

8am - 4pm (Wednesday & Thursday)

March 25-26

April 22-23

May 20-21

Charles D. Jones Co.

8701 Elmwood Ave. Suite 550

Kansas City, MO 64132

## Course Description

This course provides an in-depth discussion of the techniques associated with properly installing a M-or P-Series system. Instruction focuses on best practices, limitations, and manufacturer's requirements as they pertain to wiring, addressing, refrigerant piping, equipment installation, and refrigerant charge. Additionally, the course focuses on the service and troubleshooting of M- and P-Series systems. Instruction details the concepts and theories of M and P system operation including electrical and refrigerant circuits. The resources and techniques to troubleshoot M- and P-Series systems are discussed and reinforced with practical hands-on exercises.

## Prerequisites

M- and P-Series Product Overview (online)

## Target Audience

Installers

## Course Duration

2 Days

## Educational Credits

IACET: 1.4 CEUs, NATE: 16 hours

## Course Tuition

\$250 per seat

## Classroom Requirements

Laptop computer or Internet accessible device

## Learning Objectives

- Review the six-step installation process including refrigerant charge, DIP switches, and jumper settings
- Explain system start-up, warranty terms, and product registration procedures
- Discuss the operation and functionality of M- and P-Series control options
- Create a project using Diamond System Builder software
- Explain the steps to perform preventive maintenance on system components
- Review component technology and system operation
- Discuss electrical operation and refrigerant flow paths
- Examine the use of mode recall, fault codes, test point diagrams, service tools, and controllers to troubleshoot system operation
