

# COMBUSTION ANALYSIS

CO Safety & Combustion Analysis  
Residential, Commercial, Industrial

## Class Topics Include:

- O<sub>2</sub>, CO, CO<sub>2</sub>, Temp, Pressure, Excess Air & Combustion Efficiency
- Proper Steps to Performing a Combustion Analysis
- Measuring Points, Target Readings & Interpreting Results
- Cracked Heat Exchanger Testing
- Carbon Monoxide & Combustible Gas Safety
- Measuring Draft, Gas Pressure, & Temperature
- Differences Between Equipment & Fuel Types
- Equipment Troubleshooting & Diagnostics
- How to Make Money with a Combustion Analyzer
- How to Use & Maintain a Combustion Analyzer

### Location:

C.D. Jones Fort Collins  
825 Frontage Rd Suite 2  
Fort Collins, CO 80524

### Date:

April 1, 2026

### Time:

8am - 10am

## Class Counts for:

**2 NATE CEU Credits**  
The Gold Standard for HVACR  
Technician Certification

**3 NORA CEU Credits**  
National Oil Heat  
Research Alliance

## A New Era of Combustion Analysis
